

SHORT BIOGRAPHY

MATTHEW MAYER

Matthew Mayer is a #1 Billboard-charting pianist and composer whose independently built a catalog that has generated more than **800 million streams** worldwide.

Raised in Canistota, South Dakota—a town of roughly 700 people—Mayer began playing piano at twelve and gave some of his earliest performances on an upright piano in the waiting room of a local chiropractic clinic - sometimes with two people in attendance.

More than 25 years and 20 albums later, his music has reached a global audience.

In 2026, Mayer's career expanded further through Billboard chart success with international performances across the United States and Europe, including appearances in Switzerland, Italy, Croatia, Hungary, Austria, Brazil, and Serbia.

His album *Elevation* reflects that journey and features Croatian pianist and composer Matej Meštrović, with production by Malina Moye and Grammy Award-winning producer Masa Takumi.

Mayer is also the founder of SoloPiano.com, an independent platform supporting hundreds of piano artists by providing free solo piano artist pages wherever the artist is located. His career remains rooted in the same idea with which it began: **one piano, one melody and a connection with whoever is listening.**
